Financial Connectivity, Simplified.

AXLETREE

RADAR

RADAR by Axletree® is a one-stop solution for organizations that need to complete any kind of audit or assessment. This secure, all-in-one platform simplifies every aspect of assessment management, from data collection and user authentication to progress tracking, so you can focus on what matters most.

Swift members completing the Swift Customer Security Programme (CSP) assessment can take advantage of personalized guidance from Axletree's Swift-Certified Assessors as they complete their annual mandatory security assessment and attestation.

Why choose Axletree?

Streamlined tool to manage your mandatory assessments

RADAR acts as a single source of truth for organizations retrieving and organizing sensitive information from multiple sources.

Manage user access to ensure security of critical data

With RADAR, assign levels of user access as required to securely manage sensitive information.

Define internal Control Owners for delegation of tasks

Assign control owners to manage controls pertaining to their departments, and free up the assessment initiator to more efficiently manage and complete the assessment.

Simplified assessment progress tracking

RADAR's automated progress tracking replaces the manual labor of maintaining Excel spreadsheets of assessment progress.

Can be customized for several assessment types

RADAR can be configured to host any assessment organization require, including Swift CSP, ISO27001, SOC2, GDPR, & more

Accessible through AxleLink, our unified services platform

Access RADAR through AxleLink, our secure, unified platform for all transactions management applications.

Client Challenges We Solve

Inefficient and manual management of Swift CSP assessments creating complexity and confusion

Inadequate access controls and security measures in traditional systems, potentially compromising sensitive assessment data

Fragmented communication channels between departments hindering the efficient exchange of critical updates and evidence

Lack of visibility into assessment progress and responsibilities creates accountability gaps

Complex onboarding & inconsistent guidance from external assessors lead to prolonged assessment times

Realized Benefits for Organizations

Assessment components are already built in & configured

Strict information rights controls protecting secure information

Less burden on the initiator gathering data

Easy to keep track of assessment component status and evidence

Complete control & visibility over data shared with external assessors

All confidential data is erased after the assessment, leaving only the final report

RADAR by Axletree® gives you *Peace of Mind* with an automated assessment platform that cuts through complexity, allowing you to effortlessly manage security controls and user permissions, gather and manage critical information quickly and securely, and streamline your assessment process for a faster, easier, and stress-free experience.
